

# SHIMADZU TECHNO-RESEARCH. INC ,

Establish : April 21, 1972

The capital : ¥30,000,000

The President and Representative Director  
: Shuro Fukunaga

Shimadzu Techno Research (STR) was founded in 1972, and is a wholly owned subsidiary of Shimadzu Corporation. Shimadzu is a world-renowned manufacturer of analytical instruments and medical systems, one of researchers,

Koichi Tanaka , was awarded the 2002 Nobel Prize in Chemistry. Since the establishment, STR has actively developed an analytical service business built on our vast base of analytical technology knowledge, and supports to construct reliable and safe society. STR, though it's use of quality control, precision control, and information systems, strives to provide the most reliable data for its customers.

**Based on analytical technique developed over many years, STR actively expands it's analytical service in three fields.**

## Service related to research and testing of products and raw materials

Support for eco-friendly procurement/Analysis of substances impacting the environment /Materials analysis, structural analysis/Foreign matter analysis/Faulty product investigation /The analysis of bad odors and odors investigation/Non-destructive testing by X-ray CT/Physical property measurement

## Services related to environmental protection and environmental surveys

Environmental analysis/Environmental Impact Assessment /Environmental measures/Development of analytical technologies

## Health-related services

Pharmaceutical research support/Endocrine disruptor testing /Residual pesticide testing/Sick house, sick school testing
